

About Us

The Canadian Bioinformatics Help Desk (CBHD) provides bioinformatics support for Canadian researchers. We have been providing excellent service to the Canadian research community since February 2003.

Our diverse staff of bioinformatics professionals can handle all your bioinformatics research needs. We strive to provide the highest level of service and science.

David Wishart, PhD

Director, CBHD

Highlights of Activities

Since February 2003

- 72 service requests solved
- 35 custom programs written
- 44 programs deposited into our software repository
- 39,343 web hits
- 159 total registrants
- 321 entries in our directory of Canadian bioinformaticians

Testimonials

"Once again thanks for your help these past few weeks. We have performed the analysis of our proteins using the pI/MW calculator and the PSORT program. We shall be presenting our proteomic results related to the results that these programs gave us and we will be acknowledging you and the CBHD." **Bioinformatician, Genome BC**

"With the help from our Informatics people, we are constructing the BLAST interface so that we can allow other researchers to search our database. Thanks again for your great help! We may bother you again later." **Research Scientist, Natural Resources Canada**

"In fact, we look forward to telling other bioinformaticians the wonderful stuff you guys have done." **Bioinformatician, Genome BC**

"Thank you for the script and the text file that you sent to me. They were just what I needed. Thanks a lot." **Post-Doctoral Fellow, University of Alberta**

"We are very impressed with the program and I know it will make our work much easier. Thank you for the great work and we look forward to seeing the GO program when it is done." **Research Assistant, Natural Resources Canada**

Services

We offer a variety of services:

- Custom programming
- Website development
- Database development
- Data mining
- Batch sequence processing
- Software advice and assistance
